

Improving services

Local GPs want to make it easier for you to see them when you need to. An extra £2 million has been invested in providing more appointments, including in the evening and at weekends. Local GP practices are working together to deliver the extra appointments.

What you can expect

The Extended Primary Care Service is an extension of your GP practice. You may not see your usual doctor or nurse but they will have the same skills.

Any doctor or nurse that you see or speak to will, with your consent, have access to your health information and history. This means they will be able to offer the right care and treatment for you.

Things you should know about this service

- You need to be registered with a GP to use this service. If you need help finding a local practice to register with call **0300 311 2233** or visit www.nhs.uk
- This is not a walk-in service. Contact your usual GP practice and they will offer you an appointment here if it is right for you.
- It is more suitable for some patients, such as people with more complex needs, to be seen in their own practice. Your practice will ensure you are seen in the right place.

Remember

If you need to see a doctor or nurse call your GP practice in the usual way. If your practice is closed call the out-of-hours GP service (SELDOC) on **020 8693 9066**.
